

BACKTRACK: 15–slide pitch deck

The opening states the problem and shows the response: check today's task, practice a missing skill with Khan Academy, and return with a fresh check. The GPS route connects those actions. The first three slides explain the proposal without depending on a live demo.

The native Canva design is authoritative. This script follows its current PDF export. The 15–slide PDF and editable PowerPoint backup use DM Sans regular and bold. Smooth vector routes, separate editable labels and stops, native comparison cards, and clear separators establish the visual order. Slide 7 is entirely a clickable demo invitation.

Slide 1: Find the missing skill. Get back to today's lesson.

Explain the learner problem and the complete BACKTRACK response on the opening slide.

On–slide copy

- backtrack.
- Find the missing skill.
- Get back to today's lesson.
- THE PROBLEM
- A student gets stuck, but doesn't know which earlier skill to review.
- University of the Philippines Manila
- Check today's
- task
- Practice the missing skill
- with Khan Academy
- Return to today's lesson
- with a fresh check

Slide 2: The search can become the study session

Show how a broad search can miss a specific earlier obstacle.

On-slide copy

- The search can become the study session
- 01 WHAT THEY NEED TO FINISH
- Solve this equation
- $x^2 + 7x + 12 = 0$
- They search “quadratics”.
- 02 WHAT MAY BE BLOCKING IT
- Find the factor pair
- Multiply to 12. Add to 7.
- BACKTRACK checks the gap before choosing the repair.

Slide 3: How BACKTRACK gets a learner unstuck

Make the full learning sequence easy to follow in four steps.

On-slide copy

- How BACKTRACK gets a learner unstuck
- 1
- Try today's
- task
- 2
- Check earlier
- skills
- 3
- Practice with
- Khan Academy
- 4
- Try it again with
- fresh numbers
- Answers choose the next step. Fresh problems check the return.

Slide 4: Two wrong answers. Different help.

Show how two wrong answers can point to different starting checks.

On-slide copy

- Two wrong answers. Different help.
- For $x^2 + 7x + 12 = 0$
- $x = 3, 4$
- Right pair, wrong signs.
- Check signs and solutions.
- $x = 2, 6$
- Wrong factor pair.
- Check product and sum.
- Return with fresh numbers

Slide 5: Khan material, focused on the missing step

Show how a focused Khan segment connects to local practice and the return task.

On-slide copy

- Khan material, focused on the missing step
- 1
- Watch the key part
- 1:34 focused segment
- Match sum and product
- 2
- Try the step here
- Use the idea with
- different numbers
- 3
- Return to the goal
- Solve a fresh quadratic
- equation
- Short enough to use now. More Khan practice when they need it.
- Khan Academy: factoring quadratics

Slide 6: Back to the skill that stopped them

Make the return concrete with a fresh problem at the original level.

On-slide copy

- Back to the skill that stopped them
- FRESH CURRENT-LEVEL TASK
- $x^2 + 11x + 28 = 0$
- $x = -4$ or $x = -7$
- New numbers. The same skill they came to recover.

Slide 7: Try the demo. Watch the route change.

Invite the audience to compare the two wrong turns in the demo.

On-slide copy

- Try the demo. Watch the route change.
- Compare two wrong answers.
- See why they get different repairs.
- Try BACKTRACK
- backtrack-learning.vercel.app/demo
- Scan to start
- A few sample routes to help you picture BACKTRACK. The full product is still in
- development.

Clickable links

- <https://backtrack-learning.vercel.app/demo>

Slide 8: Can they still do it next week?

Explain lasting recovery in plain language.

On-slide copy

- Can they still do it next week?
- 1
- Stuck before the
- route
- 2
- Pass a fresh task
- after practice
- 3
- Pass again 7-14
- days later
- Retained reentry
- Count everyone who started unable to do the task.
- Spacing and retrieval · 2022

Slide 9: A five-month school pilot

Show the proposed five-month school sequence.

On-slide copy

- A five-month school pilot
- 80-120 learners across 2-3 cohorts
- NOV
- Review maps +
- baseline
- DEC
- First school
- cycle
- JAN
- Compare +
- improve
- FEB
- New educator +
- repeat
- MAR
- Follow-up +
- handover
- November 2026-March 2027
- Pilot targets, fitted to each school's access and timetable.

Slide 10: Does the route add value?

Compare two practice routines using the same assessments.

On-slide copy

- Does the route add value?
- Khan practice
- Selected by the teacher
- Khan + BACKTRACK
- Practice tied to the recovery route
- The same fresh assessments
- After practice, then 7-14 days later. Similar time and support.

Slide 11: Skip the review you don't need.

Explain how demonstrated knowledge removes unnecessary review.

On-slide copy

- Skip the review you don't need.
- What the learner does What changes
- Know the step
- Skip its review
- Repair a gap
- Move closer to the goal
- Come back later
- Keep earlier progress
- Progress changes what you need to do next.

Slide 12: One routine. Many learning goals.

Show how another destination and educator can reuse the routine.

On-slide copy

- One routine. Many learning goals.
- Fractions Algebra Graphs
- Every new destination uses a reusable kit
- A reviewed map + fresh checks + matched Khan material
- Another educator can run the same recovery routine.
- For classes, self-study, and the next topic a learner needs.

Slide 13: A budget built around learners

Make the budget and its priorities readable.

On-slide copy

- A budget built around learners
- PHP 100,000
- 60%
- for learning review, access and
- evaluation
- Learner access stays free.
- Allocation
- PHP
- Learning review
- 24,000
- Access support
- 18,000
- Evaluation
- 18,000
- Deployment
- 16,000
- Product operations
- 8,000
- Teacher onboarding
- 8,000
- Recruitment content
- 3,000
- Contingency
- 5,000
- Total
- 100,000
- Planning allocation

Slide 14: A route back to today's lesson.

Resolve the opening problem and identify the team.

On-slide copy

- backtrack.
- A route back to
- today's lesson.
- University of the Philippines Manila
- Matthew Labrador, Paul Recio, Harry Gomez
- Coach: Justin Mesias

Slide 15: Research behind the approach

Provide clickable research sources.

On-slide copy

- Research behind the approach
- Khan Academy teacher reports
- ALEKS custom objectives
- Gemini study notebooks · 2026
- IES learning practice guide
- Spacing and retrieval · 2022
- Confidence assessment · Foster
- Self-Determination Theory in education
