

BACKTRACK: 15–slide pitch deck

The opening makes the need visible before asking anyone to try the demo: a learner may be stuck on one step while searching whole lessons. The answer gives BACKTRACK a clue about which check to try, a short Khan repair supports that step, and fresh tasks check the return.

Exactly 15 slides. The native Canva design is the authoritative editable version. The current PDF is exported from Canva; the PowerPoint is a backup with embedded DM Sans regular and bold. The slides use one font family, a subtle paper texture, native separators, clear flows, and aligned comparisons. Slide 7 is dedicated to the demo, with a clickable button, visible link, and QR.

Slide 1: backtrack.

Make the navigation problem understandable in one glance.

On–slide copy

- backtrack.
- Stuck on one step.
- Lost in whole lessons.
- Find the step. Get a focused Khan repair. Return to your task.
- University of the Philippines Manila

Slide 2: The search can become the study session

Show how a broad search can miss a specific earlier obstacle.

On-slide copy

- The search can become the study session
- 01 WHAT THEY NEED TO FINISH
- Solve this equation
- $x^2 + 7x + 12 = 0$
- They search “quadratics”.
- 02 WHAT MAY BE BLOCKING IT
- Find the factor pair
- Multiply to 12. Add to 7.
- BACKTRACK checks the gap before choosing the repair.

Slide 3: A short repair. A clear way back.

Explain the complete recovery loop without relying on a live demonstration.

On-slide copy

- A short repair. A clear way back.
- 1
- Try today's task
- 2
- Find a useful
- earlier step
- 3
- Learn + practise
- with Khan
- 4
- Try a fresh
- current task
- Your answer shapes the route. The repair fits the missing step.

Slide 4: Two wrong answers. Different help.

Show that two wrong answers can point to different starting checks.

On-slide copy

- Two wrong answers. Different help.
- Tried $x = 3, 4$
- Check signs to fresh goal
- Tried $x = 2, 6$
- Check factors
- Fresh goal
- The mistake points to the starting check.

Slide 5: Khan material, focused on the missing step

Make a focused Khan learning stop concrete.

On-slide copy

- Khan material, focused on the missing step
- 1
- Watch the key part
- 1:34 focused segment
- Match sum and product
- 2
- Try the step here
- Use the idea with
- different numbers
- 3
- Return to the goal
- Solve a fresh quadratic
- equation
- Short enough to use now. More Khan practice when they need it.
- Khan Academy: factoring quadratics

Slide 6: Back to the skill that stopped them

Show the fresh return at the original level of difficulty.

On-slide copy

- Back to the skill that stopped them
- FRESH CURRENT-LEVEL TASK
- $x^2 + 11x + 28 = 0$
- $x = -4$ or $x = -7$
- New numbers. The same skill they came to recover.

Slide 7: Try the demo. Watch the route change.

Invite the audience to compare two answers in the interactive sample.

On-slide copy

- Try the demo. Watch the route change.
- Compare two wrong answers.
- See why they get different repairs.
- Try BACKTRACK
- `backtrack-learning.vercel.app`
- Scan to start
- A few sample routes to help you picture BACKTRACK. The full product is still in
- development.

Clickable links

- <https://backtrack-learning.vercel.app/demo>

Slide 8: Can they still do it next week?

Explain lasting recovery in plain language.

On-slide copy

- Can they still do it next week?
- 1
- Stuck before the
- route
- 2
- Pass a fresh task
- after practice
- 3
- Pass again 7-14
- days later
- Retained reentry
- Count everyone who started unable to do the task.
- Spacing and retrieval · 2022

Slide 9: A five-month school pilot

Show the five-month pilot sequence.

On-slide copy

- A five-month school pilot
- 80-120 learners across 2-3 cohorts
- NOV
- Review maps +
- baseline
- DEC
- First school
- cycle
- JAN
- Compare +
- improve
- FEB
- New educator +
- repeat
- MAR
- Follow-up +
- handover
- November 2026-March 2027
- Pilot targets, fitted to each school's access and timetable.

Slide 10: Does the route add value?

Compare two practice routines against the same assessments.

On-slide copy

- Does the route add value?
- Khan practice
- Selected by the teacher
- Khan + BACKTRACK
- Practice tied to the recovery route
- The same fresh assessments
- After practice, then 7-14 days later. Similar time and support.

Slide 11: The route is the reward

Show how progress changes the next action.

On-slide copy

- The route is the reward
- What the learner does What changes
- Know the step
- Skip its review
- Repair a gap
- Move closer to the goal
- Come back later
- Keep earlier progress
- Progress changes what you need to do next.

Slide 12: One routine. Many learning goals.

Explain how another destination and educator can reuse the routine.

On-slide copy

- One routine. Many learning goals.
- Fractions Algebra Graphs
- Every new destination uses a reusable kit
- A reviewed map + fresh checks + matched Khan material
- Another educator can run the same recovery routine.
- For classes, self-study, and the next topic a learner needs.

Slide 13: A budget built around learners

Show the planned budget and priorities.

On-slide copy

- A budget built around learners
- PHP 100,000
- 60%
- for learning review, access and
- evaluation
- Learner access stays free.
- Allocation
- PHP
- Learning review
- 24,000
- Access support
- 18,000
- Evaluation
- 18,000
- Deployment
- 16,000
- Product operations
- 8,000
- Teacher onboarding
- 8,000
- Recruitment content
- 3,000
- Contingency
- 5,000
- Total
- 100,000
- Planning allocation

Slide 14: backtrack.

Resolve the opening problem and introduce the team.

On-slide copy

- backtrack.
- A route back to today's
- lesson.
- University of the Philippines Manila
- Matthew Labrador, Paul Recio, Harry Gomez
- Coach: Justin Mesias

Slide 15: Research behind the approach

Provide clickable research sources.

On-slide copy

- Research behind the approach
- Khan Academy teacher reports
- ALEKS custom objectives
- Gemini study notebooks · 2026
- IES learning practice guide
- Spacing and retrieval · 2022
- Confidence assessment · Foster
- Self-Determination Theory in education
