

BACKTRACK: 15–slide pitch deck

Exactly 15 slides including cover and sources. The final PDF must include the verified separate deployment link on slides 1, 4 and 14. Main style: predominantly white, one interface typeface, violet actions and teal routes, matching the final website.

Slide 1: Your GPS recalculates. Why doesn't learning?

Exact on–slide copy

- Your GPS recalculates. Why doesn't learning?
- BACKTRACK
- A new route to the lesson you need now.
- University of the Philippines Manila

Key visual

A route bends around a missing step and reconnects to a fixed destination.

Evidence or source

Working BACKTRACK concept; no outcome claim.

Purpose

Make the metaphor immediately understandable.

Keep out

Statistics, feature lists, or a long team introduction.

Slide 2: “Review.” Review what?

Exact on–slide copy

- “Review.” Review what?
- TODAY'S CLASS
- $x^2 + 7x + 12 = 0$
- A learner can be stuck here because of a step underneath.

Key visual

Large current equation, with factoring and multiplication named underneath as possible checks.

Evidence or source

Illustrative mathematics; local need validation pending.

Purpose

Show the navigation problem without reducing the education crisis to one cause.

Keep out

Invented student quotations, national causation claims, and stock crisis numbers.

Slide 3: The destination stays. The route changes.

Exact on-slide copy

- The destination stays. The route changes.
- Current goal
- Check a prerequisite
- Find useful practice
- Fresh return task

Key visual

Editable route diagram that inserts a prerequisite detour while retaining the goal.

Evidence or source

Implemented route behavior; authored dependency map.

Purpose

Explain the product in one visible loop.

Keep out

A dense full curriculum graph or a claim of exact diagnosis.

Slide 4: The reward is less review.

Exact on-slide copy

- The reward is less review.
- Two fresh checks
- One review removed
- Your earlier progress stays.

- Try BACKTRACK

Key visual

Before/after route drawings with one specific review stop removed, not fake minutes saved.

Evidence or source

Illustrative states from the working product; no field retention result.

Purpose

Demonstrate the signature motivation mechanic and link to the product.

Keep out

XP, fabricated saved minutes, or a made-up learner outcome.

Slide 5: Khan is the learning engine.

Exact on-slide copy

- Khan is the learning engine.
- WATCH HERE
- Official Khan lessons inside the route.
- PRACTICE ON KHAN
- Matched exercises in an existing learning environment.
- RETURN HERE
- Fresh checks reconnect the route.

Key visual

Official Khan logo and three clear stages, with practice visually central.

Evidence or source

Khan resources and official teacher reporting guide.

Purpose

Make the platform relationship concrete for the 25% integration category.

Keep out

Claiming an API relationship, automatic result sync, or endorsement.

Slide 6: Back to today's lesson.

Exact on-slide copy

- Back to today's lesson.
- FRESH DESTINATION TASK
- $x^2 + 11x + 28 = 0$
- $x = -4$ or $x = -7$
- The route ends with something the learner can demonstrate.

Key visual

The fresh equation and worked return, with the route reconnecting.

Evidence or source

Worked product example. Formal learning outcomes remain unmeasured.

Purpose

Show the intended capability rather than claiming a pilot outcome.

Keep out

Presenting this authored example as data from a real student.

Slide 7: Did the return last?

Exact on-slide copy

- Did the return last?
- RETAINED REENTRY
- Pass a fresh destination task after the route
- Pass again 7-14 days later
- Report against every enrolled baseline-blocked learner.

Key visual

Post and delayed check connected to a single clearly named outcome.

Evidence or source

Proposed evaluation design; retrieval and spacing research informs timing.

Purpose

Give judges one memorable, defensible metric.

Keep out

An invented recovery percentage or excluding missing follow-up.

Slide 8: Five months to earn the evidence.

Exact on-slide copy

- Five months to earn the evidence.
- 80-120 learners
- 2-3 cohorts
- Planning targets, subject to school agreements, permissions and access.
- NOV · Review + baseline
- DEC-JAN · First cycle + comparison
- FEB · Second educator + replication
- MAR · Follow-up + handover

Key visual

A clean November-March implementation timeline.

Evidence or source

Official KEIC implementation dates; proposed cohort and plan.

Purpose

Separate the ambitious product from the bounded proof.

Keep out

Implying schools or learners are already committed.

Slide 9: A fair comparison.

Exact on-slide copy

- A fair comparison.
- Teacher-selected Khan practice
- BACKTRACK-supported Khan practice
- Comparable access time and adult support.
- Fresh post and delayed tasks in both groups.
- Randomized delayed start where feasible. Otherwise report feasibility, not causation.

Key visual

Two parallel study conditions converging on the same assessments.

Evidence or source

Proposed design; school and evaluator approval required.

Purpose

Show that the team intends to test incremental value.

Keep out

Power claims, assumed effect sizes, or a false claim that randomization is secured.

Slide 10: Adaptive learning already exists.

Exact on-slide copy

- Adaptive learning already exists.
- ALEKS · Objectives and prerequisites
- Gemini · Goal-based diagnosis and study plans
- Khan · Personalization and learning infrastructure
- Our opportunity: a repeatable Khan recovery routine that schools can inspect and test.

Key visual

A clear competitor acknowledgment with the proposed workflow distinguished beneath it.

Evidence or source

ALEKS custom objectives; Google study notebooks, June 2026; Khan Learning Paths documentation.

Purpose

Defuse the strongest novelty objection before Q&A.

Keep out

“We invented adaptive learning” or “AI cannot diagnose gaps.”

Slide 11: One goal. A manageable routine.

Exact on-slide copy

- One goal. A manageable routine.

- Teacher confirms the destination.
- Learners follow different routes.
- Khan assignments provide practice.
- Separate supervised tasks check the return.
- Measure teacher minutes, not just learner clicks.

Key visual

One class destination branches into routes, then returns to an educator's assessment.

Evidence or source

Proposed school workflow; sharing a topic link works in the current build.

Purpose

Make adoption credible and burden measurable.

Keep out

A fake classroom dashboard with invented participant counts.

Slide 12: A kit another educator can use.

Exact on-slide copy

- A kit another educator can use.
- A reviewed destination map
- Checks and answer rationales
- Matched Khan material
- Parallel return assessments
- Facilitator and reporting guide
- Topic links for schools, Reels and self-study.

Key visual

The reusable kit as six plainly labeled components, with the second educator as the replication test.

Evidence or source

Proposed replication model; two working topic entries.

Purpose

Show what actually scales beyond the student team.

Keep out

A national rollout map or unearned thousands-of-users claims.

Slide 13: PHP 100,000 implementation scenario.

Exact on-slide copy

- PHP 100,000 implementation scenario.
- Learning review · 24,000
- Access support · 18,000
- Deployment · 16,000
- Evaluation · 18,000
- Product operations · 8,000
- Teacher onboarding · 8,000
- Recruitment content · 3,000
- Contingency · 5,000
- Planning allocation. Not quotes or secured funds. Learner access stays free.

Key visual

Readable allocation list with an explicit total and measured-cost commitment.

Evidence or source

BACKTRACK planning allocation; official champion implementation-grant amount.

Purpose

Demonstrate resource choices and honest unit economics.

Keep out

Treating the team award as grant money or inventing a school price.

Slide 14: Keep the goal. Change the route.

Exact on-slide copy

- Keep the goal. Change the route.
- BACKTRACK · University of the Philippines Manila
- Matthew Labrador · Paul Recio · Harry Gomez
- Coach: Justin Mesias

- A new route to today's lesson. A clear way to measure the return.
- Try BACKTRACK

Key visual

A completed route and the product link, followed by the named team.

Evidence or source

Team names supplied by Matthew.

Purpose

Close with the product idea and a clear invitation to use it.

Keep out

A fake partner logo wall, promised victory, or unmeasured success claims.

Slide 15: Research behind the approach

Exact on-slide copy

- Research behind the approach
- Khan Academy teacher reporting
- ALEKS custom objectives
- Google Gemini study notebooks · June 25, 2026
- IES learning practice guide
- Carpenter, Pan & Butler · Spacing and retrieval
- Foster · Confidence assessment
- Self-Determination Theory in education

Key visual

A readable linked research inventory supporting the learning design and competitor comparison.

Evidence or source

Exact research URLs in notes and the source links on this page.

Purpose

Make substantive claims auditable.

Keep out

Organizer rules, application links, internal review notes, tiny URLs, or extra pages.
