

Dunlo: submission package

What to use

Upload **Dunlo_KEIC_2026.pdf** as the pitch deck. It must contain exactly 15 pages. Copy the seven project answers from **PROJECT_ANSWERS.txt** or docs/SUBMISSION_COPY.md into their corresponding fields. Do not upload a storyboard or developer document as the deck.

The owner confirmed the institution, adviser and student fields are already filled. Keep those fields and review the new project content before submitting.

Links

- Product: <https://dunlo.vercel.app/>
- Explore: <https://dunlo.vercel.app/explore>
- Deck main button and QR: <https://dunlo.vercel.app/>
- Application: <https://form.typeform.com/to/bJw9THj3>

The demo retains the original recovery example and offers a clear entrance to Explore.

Form limits

Seven narratives: 300 words or fewer each. The executive field still has max_length 300 in the public definition checked September 13, 2026. Use the included character-limit fallback if the field enforces it. PDF deck: no more than 15 slides; this deck uses 15.

Deadline: **September 18, 2026, 11:59 PM Philippine time**, confirmed in Khan Academy Philippines' official announcement. The competition application itself is not submitted by this build process.

Final checks

- Use the final exported PDF, open all 15 pages and check the demo link.
- Keep the completed team fields and review the declarations in the portal.
- Paste each narrative in the matching field and use the executive fallback if needed.
- Upload the deck, submit personally, and retain the receipt.
