

You watched it. Can you use it?

Dunlo connects discovery to practice with Khan Academy.

Explore
an idea

Practise with
Khan Academy

Return for
a fresh question

Starting is only the first step

An interesting explanation needs a useful continuation.

Where do I begin?

Choose an approachable idea.

Play with it. Follow your curiosity.

What comes next?

Find the relevant practice.

Get help, then return to the idea.

KEIC focus: reach, meaningful engagement and lasting impact

The learning journey

Useful support keeps the original learning goal within reach.

Explore a short learning feed

One idea at a time. A clear way to keep going.

Play with the model

Change a quantity.
See the relationship.

Save, share or follow the idea
Open a relevant Khan activity.

Open Explore · dunlo.vercel.app/explore

Make the relationship visible

Separate the pieces. Put the idea together.

The pieces keep their meaning.

	x	4	
x	x^2	$4x$	$3x + 4x$ $= 7x$
3	$3x$	12	

Separate the four pieces

FOUR AREAS

$$x^2 + 3x + 4x + 12$$

Each part keeps its meaning.

COMBINE

$$3x + 4x = 7x$$

The middle terms belong together.

RESULT

$$x^2 + 7x + 12$$

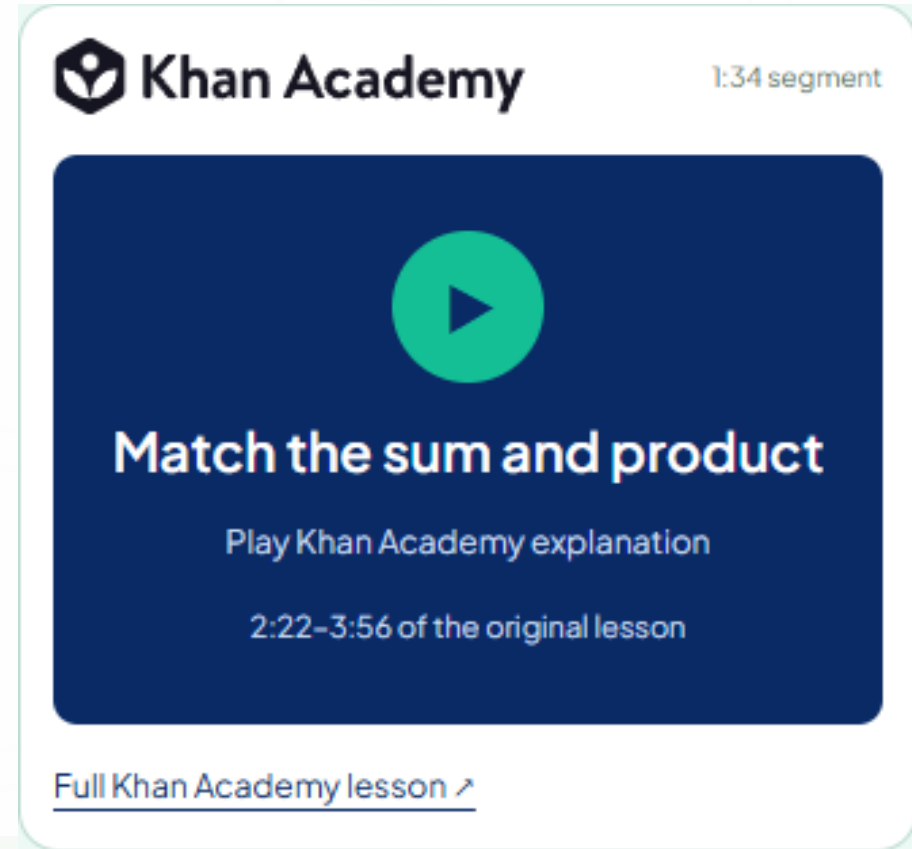

Then try a different question.

Khan Academy, right in the feed

FACTORING · 1 MIN 34 SEC

Watch the original.
Then try the idea.

A focused explanation,
with a useful next step.

A screenshot of a video player interface for a Khan Academy lesson. At the top left is the Khan Academy logo, and at the top right is the text "1:34 segment". The main area is a dark blue rectangle with a large green play button in the center. Below the play button, the title "Match the sum and product" is written in white. Underneath the title, it says "Play Khan Academy explanation" and "2:22-3:56 of the original lesson". At the bottom of the player, there is a link that says "Full Khan Academy lesson" with an external link icon.

Useful help when a step is difficult

1

A fresh check
clarifies the difficulty

2

An explanation
works through the
step

3

A new question
returns to the goal

The learner can also choose to learn first.

The existing recovery engine connects the support and return.

See the recovery example

Try the complete journey

Explore an idea, open Khan practice,
and return for a fresh question.

Try Dunlo

dunlo.vercel.app

Explore freely, or bring your current learning goal.

Scan to explore

Khan learning has a clear continuation

The same idea connects discovery, practice and review.

Your place is saved when you open Khan practice.

Khan sources are labelled. Completion reports and fresh answers stay separate.

A useful reason to return

Today

Save a discovery.
Use it on a fresh question.

Later

Revisit the idea.
Try it in another situation.

Your place and your learning tools stay together
